

MiNi-SMMS 

AIR CONDITIONING
FOR SMALL AND
MEDIUM-SIZE BUILDINGS

MiNi-SMMS-e

SMMS-e

SHRM-e

Toshiba's MiNi-SMMS-e is designed for small and mid-size buildings, where optimum performance is required for a variety of commercial applications such as shops, offices, large apartments — where unobtrusive appearance and quiet operation are important. The MiNi-SMMS-e's flexible configuration allows operation of up to nine indoor units and is available in seven capacities of up to 12 HP.

FEATURES

HIGHER ENERGY SAVINGS

MiNi-SMMS-e achieves world-class COP and EER thanks to an integrated combination of Toshiba's more advanced twin rotary compressor, vectorcontrolled inverter and heat exchanger technologies.

HIGHER COMFORT AND EASE

A single outdoor unit is powerful enough to accommodate independently controlled interior units, delivering ideal quiet comfort to every room.

HIGHER INSTALLATION FLEXIBILITY

MiNi-SMMS-e's small footprint allows for fast and easy installation. Furthermore, a maximum piping extension affords unprecedented configuration flexibility, making this unit ideal for a wide variety of applications.
